

Attractive cement block residence; blocks faced with Medusa White Cement, Waterproofed with Medusa Waterproofing, and laid in Medusa Waterproofed Cement Mortar. A *dry* house, through and through.

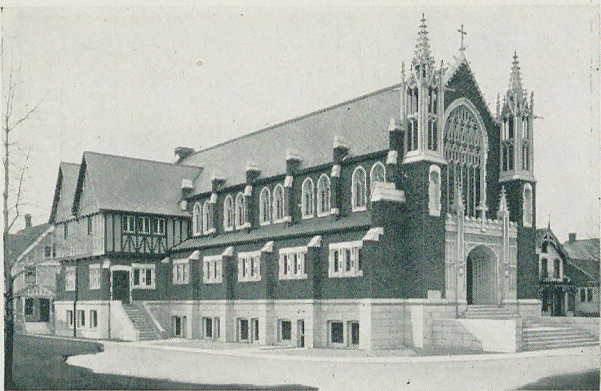

MEDUSA

WHITE CEMENT

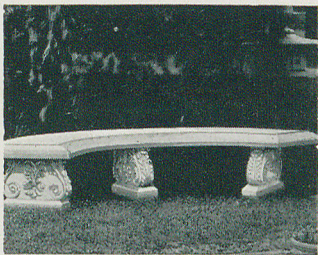

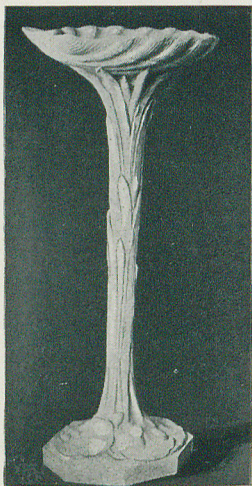

WATERPROOFED

PLAIN

The precast trim, made with Medusa Waterproofed White Cement, gives this church real distinction and character.

Three other interesting "outdoors" uses for precast work done in Medusa White Cement. Can't you "transplant" some of these or similar ideas to *your* lawn with advantage and profit?

Just a bit of decoration—elaborate and rich, but wonderfully effective. It looks like the most painstaking handcarving in stone: in reality it is clever precast work, done in Medusa Stainless White Cement.

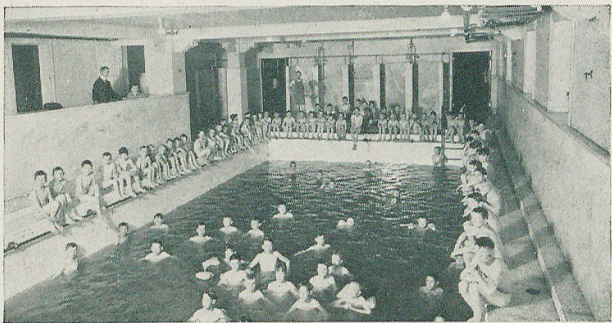

Medusa White Cement— All-Around Helpful Material

ORNAMENTAL building blocks, accurately imitating cut stone but at a fraction of the cost of the latter; building trim, lawn and garden furniture, etc.—these are only a few of the interesting, worth-while uses to which Medusa White Cement can be put.

Work done in Medusa *Waterproofed* White Cement, costing but a trifle more than our plain White, will keep out moisture permanently—will not discolor even after a heavy rainstorm.

*Full particulars given in our interesting booklet
"Medusa White Cement". Write for it.*

Cleveland, Ohio

Make Pools *Permanently* White and *Permanently* Leakproof

SWIMMING and ornamental pools, indoors or out, should be lined with a finish coat of Medusa *Waterproofed* White Cement Plaster or Mortar, as a protection against discoloration and leakage. We shall be glad to furnish particulars on request.
